The Annual VPCI/Laserfiche Users Workshop that you all have come to love and enjoy is on the move to Spirit Mountain Resort. Why the change you ask? All we can say is come to this years' workshop and see why! We promise you won't be disappointed. We are pleased to announce that we have been successful in negotiating better room rates that fit this economy and other great arrangements as well!

The newly expanded resort has an Events Center that is smoke-free and state of the art. We will be meeting in their largest room and will have our Breakout Sessions in different rooms. The main event center will be walled off, depending on the number of attendees we have registered this year.

We are always looking for technology-rich locations to host our Workshops and this one will take the prize! The Events Center has WiFi throughout, including your hotel rooms! There are huge 12 foot screens with in-ceiling projectors. So, regardless of where you are seated, you will be able to see the screens and will not miss a thing!

VPCI is proud of our Annual Workshop event and this will be number eleven. Due to the fact that we need to confirm seating and meal planning, we are asking everyone to try to get registered and paid before June 1st, 2010. **(Please ask about our early bird registration discount!!)**

Registering early will assist us in confirming the exact room configuration and to decide on what everyone will be eating. As many of you know, we provide most of your meals during our event.

Please go online and take a look at Spirit Mountain Resort: <http://spiritmountain.com/lodging-resort-vacation-oregon-coast/casino-lodging-grand-ronde-oregon>

You will see why we are so pleased to be back there after 3 years elsewhere. We know you will enjoy our venue and the training will be even better than ever!

We love your input, so please begin by registering and then send us any recommendations and suggestions you might have for our Workshop.

The clock is ticking and it will be great to see you all! We are hoping for a great turnout and have already seen confirmation by many of you that will be attending.

I wish to personally thank you for all past, present and future business and believe that 2010 is going to be a terrific year for us all!

Vicki Pattle, President

VPCI

WE NEED YOUR INPUT!

How would you like to get receive our newsletters? HTML, Text, pdf, or a Link?

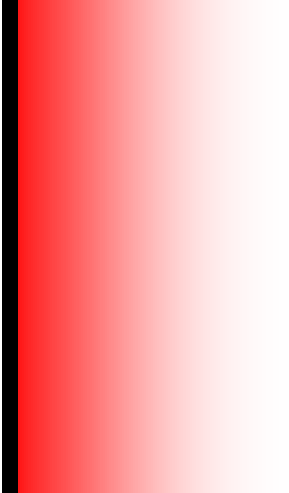

We need class suggestions/requests for the Annual Workshop! Please send your suggestions to: kristineg@vpci.com

Know someone that would like to receive our newsletter? Please contact us at info@vpci.com so we can add them!

Early bird special!!

Register for the Annual workshop by June 1st, 2010 and receive a **\$50.00**

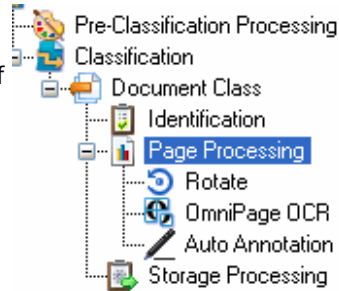

discount. Which brings your fee down to \$375.00

QUICKFIELDS 8.01 RELEASED!

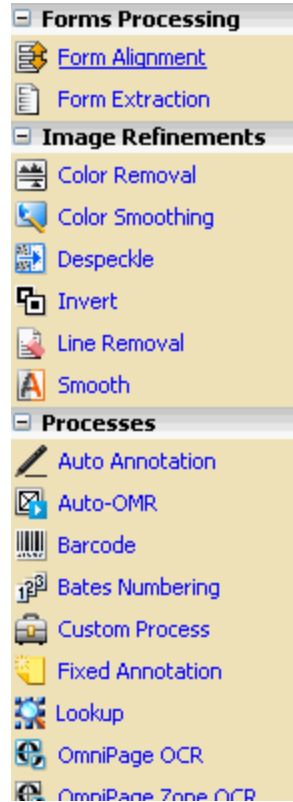

Quickfields 8.01 has been released for customers now.

If your server has been upgraded to Laserfiche Server 8.0.2 or greater you can take advantage of all the benefits of the new version of QuickFields.

Also, QuickFields Agent has been enabled with this most recent release.

Module Packages have changed! Some Packages are no longer available as standalone, but they have been packaged together as they are very complimentary. Please contact an account specialist or info@vpci.com if you have any questions!

For more information about any new products, please contact your product specialist.

IMPORT AGENT 8.1 RELEASED!

If you have been stuck with Import Agent 7 running on your Laserfiche 8 server, you no longer have to worry about a mixed environment. Import Agent 8.1 has been release and is designed for use with a Laserfiche 8.1 server environment!

Not Familiar with Import Agent yet? It is a tool for automation of importing document from your file system into your Laserfiche Repository. It is great for use with Large Multi-Functional Printers/Scanners that can send scanned documents to a network folder. Use Import Agent to auto-import them into Laserfiche!

.NET NATIVE LASERFICHE SDK COMING SOON!

For those of you that have the Laserfiche Integrator's Toolkit, there is great news! The Toolkit is becoming the Laserfiche SDK. The bonus to this is the .NET native libraries that will be a part of it. Of course the COM Libraries will still be there to use for all of your legacy applications, but you can start using all the functionality of .NET with new or updated code! VPCI Will be utilizing these new features found in the Laserfiche SDK for all of our programming projects!

LASERFICHE 8 UPGRADES

So far, most of our customers have now upgraded to Laserfiche 8.x from an earlier version. However, we would love to see all the remaining Laserfiche 7 customers become Laserfiche 8 customers!

There are many benefits to upgrading your systems. Multiple Value fields is a huge bonus that is a part of LF8 that many organizations have been able to use in ways to make their searching simpler for their users.

Questions or would you like to receive a quote, please contact Kristine Glaspey: kristineg@vpci.com Budget constraints? We have done 95% of our upgrades via remote connection. This saves you mileage & per diem!

VPCI PARTNERS

VPCI can now assist with solutions that are complimentary to Laserfiche but are stand-alone applications as well. We have begun working with several new partners that supply some top notch software packages!

FileTek: Trusted Edge® Intelligent Email Archive is a unique information classification and archive platform that can automatically intercept, classify, tag and move email assets as they are created and read. The system is driven by a set of managed policies that allow it to understand the contents of email as it flows through the enterprise and to make intelligent decisions about how each message should be processed and archived.

Lincware: Whether it be a complex multi-section application or a half-page "name and date," eForms created and managed with LincDoc Standard Edition will quickly fortify your operation by helping standardize eForms best practices. Installed locally, Standard Edition can work from MS Word or PDF templates if needed, offers permission-based log-ins and user tracking, up-to-the-minute version control, company database integration, Laserfiche interface and eForm search capabilities.

iCompass: CivicWeb and AcademicWeb automates the entire meeting process within one system. It also reduces paper consumption, contains 'smart' templates, and enables the shifting of time savings to tackle other key priorities. There is also an integrated TRACKING component that provides real-time and complete visibility into what's going on across the entire organization thus ensuring everyone knows what's actionable and where things are at.

Peladon Software: DocXP™ is a highly modular document and data capture software package that can handle practically any type of document from structured forms to unstructured documents such as invoices, purchase orders and EOBs. DocXP™ utilizes Automated Data Capture for structured forms processing and Intelligent Data Capture for unstructured documents.

You can find more information and links to our Partners web sites from WWW.VPCI.COM or email us: info@vpci.com

VPCI INFORMATION:

MEET VPCI:

Please welcome David Howard to our team. Many of you may have already met him since he's been with us since last summer!

David has over 10 years experience providing hardware, software and peripheral solutions to Educational Institutions across the United States. David has worked closely with Curriculum Departments and Instructional Technology Coordinators to determine core products and training to create innovative ways to use technology in the classroom for both teachers and students. He also has over 5

years experience in providing IT and Web Page Solutions to small to medium sized businesses and organizations in the Northwest. He enjoys personally meeting with potential and existing clients helping them determine solutions for more efficiency and productivity to increase business. David also enjoys Travel, Music, Pets, Sports and the great outdoors.
